## EUP20D-2HMC-0

## Summary

EUP2OD-2HMC-0 is a 2OW AC/DC constant current mode output LED driver featuring the multiple levels selectable by DIP switch and complies with DALI standard protocol IEC 62386-209 EUP2OD-2HMC-0 can be connected to DALI main controller or Touch DIM to a chieve a smooth dimming effect.

## Product Features

-Two channel output, output current level selectable by DIP S.W.

Meet DALI Protocol IEC 62386-209
Support Touch-DIM function High efficiency up to 86 \%
Built-in active PFC function
Dimming effect smooth, no flicker
Protections: Short circuit, over load, over Voltage
Suitable for indoor LED lighting application, such as down light, panel light, and so on

Application

## Technical Paramaters

| Model | EUP20D-2HMC-0 |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## Dimension(mm)

DALI Wiring

## DALI Diagram

220-240V

## Push DIM(Touch DIM) Diagram

Remark: Only use open push button without indicator light. Maximum cable length between each Unit: 20 meters.

## Push DIM/Coloer Switch

1. Press and hold the push DIM switch for 8s or more to enter the push dimming mode.
2. Press the push DIM switch briefly to turn on or off the lamp and return to the last memory state.
3. Press and hold the push DIM switch for dimming, stop at the current brightness when releasing, and adjust in the opposite direction every time, with the dimming range of $5 \%-100 \%$
4. Double click the push DIM switch to turn on the lamp to the brightest and cool light (this function is also used to adjust the consistency of multiple power supplies in the same circuit)
5. Colour switch is valid only after entering push DIM mode.
6. Press colour SWITCH briefly to set the color temperature mode, with 9 values between 2,700 and $6,500 \mathrm{~K}$.
7. Long press Colour SWITCH can continuously adjust the color temperature. Every long press, the color temperature will be adjusted in the opposite direction, with the color temperature range of $2700-6500 \mathrm{~K}$ 。
8. Double click colour switch, turn on the lamp to the brightest, cold light (this function is also used to adjust the consistency of multiple power supplies in the same circuit)

## Cautions

1.This product should be installed by qualified personnel.
2.This product is non waterproof, need to avoid sun and rain.In case of outdoor use, please ensure it is mounted in a water proof enclosure.
3.Good heat dissipation conditions extend product life. Please install the product in a well-ventilated environment.
4.Please make sure LED power supply output voltage, current is used to meet the product requirements.
5.Please ensure that adequate sized cable is used from the controller to the LED lights to carry the current. Please also ensure that the cable is secured tightly in the connector. 6.Due to safety concerns, PVC or rubber cord of $0.75-1.5 \mathrm{~mm}^{2}$ is recommended for input and output terminal(s)(excluding signal terminals). Flat power cord is not suitable.Ensure all wire connections and polarities are correct before applying power to avoid any damages to the LED lights.
7.In case of malfunction, do not repair it yourself.
